**RESOLUTION NO. 190-072021: Resolution Urging the United States Congress to Enact the Energy Innovation and Carbon Dividend Act.**

WHEREAS, an Intergovernmental Panel on Climate Change issued a special report on the impacts of global warming of 1.5°C above pre-industrial levels in October 2018, warning that global warming is likely to reach 1.5°C between 2030 and 2052 if it continues to increase at the current rate; and

WHEREAS, the United Nations climate science body said in a monumental climate report that we have only until 2030 to make massive unprecedented changes to global energy infrastructures to limit global warming to moderate levels; and

WHEREAS, the United States government released its Fourth Annual Climate Assessment in November 2018, reporting that the impacts of climate change are already being felt in communities across the county, and that more frequent and intense extreme weather and climate-related events, as well as changes in average climate conditions, are expected to continue to damage infrastructure, ecosystems, and social systems that provide essential benefits to communities; and

WHEREAS, conservation estimates by the world's climate scientists state that, to achieve climate stabilization and avoid cataclysmic climate change, emissions of greenhouse gases (GHGs) must be brought to 90-95% below 1990 levels by 2050; and

WHEREAS, the environmental, health, and social costs of carbon emissions are not included in prices paid for fossil fuels but rather these externalized costs are borne directly and indirectly by all Americans and global citizens; and

WHEREAS, to begin to correct this market failure, Congress can enact HR763 the Energy Innovation and Carbon Dividend Act to assess a national carbon fee on fossil fuels based on the amount of CO<sub>2</sub> the fuel will emit when burned and allocate the collected proceeds to all households in the United States in equal per-capita shares in the form of a monthly dividend; and

WHEREAS, for efficient administration, the fossil fuels fee can be applied once, as far upstream in the economy as practical, or at the port of entry in the United States; and

WHEREAS, as stated in HR763 the Energy Innovation and Carbon Dividend Act, a national, revenue-neutral carbon fee starting at a rate of \$15 per ton of CO<sub>2</sub> equivalent emissions and resulting in equal charges per ton of CO<sub>2</sub> equivalent emissions in each type of fuel or greenhouse gas, should be assessed to begin to lower dangerously high CO<sub>2</sub> emissions. The yearly increase in carbon fees, including other greenhouse gases, shall be at least \$10 per ton of CO<sub>2</sub> equivalent each year, with the provision that the annual increase will be \$15 per ton of CO<sub>2</sub> equivalent if the statutory goals are not met; and

WHEREAS, the Energy Innovation and Carbon Dividend Act specifies that, in order to protect low- and middle-income citizens from the economic impact of rising prices due to carbon fees, equal monthly per-person dividend payments shall be made to all American households (one-half payment per child under 19 years old) each month from the fossil fuel fees collected. The total value of all monthly dividend payments shall represent 100% of the net carbon fees collected per month; and

WHEREAS, the Energy Innovation and Carbon Dividend Act encourages market-driven innovation of clean energy technologies and market efficiencies which will reduce harmful pollution and leave a healthier, more stable, and more prosperous nation for future generations; and

WHEREAS, the Energy Innovation and Carbon Dividend Act will, after 12 years, lead to a decrease in America's CO<sub>2</sub> emissions by 40 percent and preserve national employment; and

WHEREAS, board adjustments- carbon content-based levies on products imported from countries without comparable carbon pricing and refunds to our exporters of carbon fees paid- can maintain the competitiveness of U.S. business in global markets; and

WHEREAS, a national carbon fee can be implemented quickly and efficiently, and will respond to the urgency of the climate crisis because the federal government already has in place mechanisms needed to implement and enforce the fee, and already collects fees from fossil fuel producers and importers; and

WHEREAS, a national revenue-neutral carbon fee would make the United States a leader in mitigation climate changes and in the clean energy technologies of the 21<sup>st</sup> century and would provide incentives to other countries to enact similar carbon fees, reducing global CO<sub>2</sub> emissions without the need for complex international agreements.

NOW, THEREFORE, BE IT RESOLVED that the of Winnebago County Board of Supervisors, urges the United States Congress to enact without delay HR763 the Energy Innovation and Carbon Dividend Act; and

BE IT FURTHER RESOLVED, by the Winnebago County Supervisors that it hereby directs the Winnebago County Clerk to forward a copy of this Resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Majority Leader of the Senate, to each U.S Senator and Representative from the State of Wisconsin in the Congress of the United State, and to nearby city and county government urging that they pass similar resolutions.

**RESOLUTION NO. 191-072021: Amending the Table of Organization for the Sheriff's Office to Convert Part-Time Corrections Officer Positions to Full-Time Correction Officer Positions**

WHEREAS, the Table of Organization for the Winnebago County Sheriff's Office currently authorizes 59 full-time Corrections Officer positions and five part-time Corrections Officer positions; and

WHEREAS, for a number of years the part-time Corrections Officers have been budgeted to work, and have in fact worked, as many hours as full-time Corrections Officers, and under the terms of the Collective Bargaining Agreement are entitled to the same benefits as full-time officers; and

WHEREAS, there is a statewide and nationwide shortage of qualified individuals wishing to serve as Corrections Officers, and we have not been able to keep all of the authorized positions filled; and

WHEREAS, having part-time positions adds to the difficulty in recruiting, since part-time positions are not as attractive to potential applicants as are full-time positions; and

WHEREAS, while part-time positions were previously advantageous in regard to flexibility in scheduling, this is no longer the situation due to the required overtime for part-time Correctional Officers caused by vacant positions;

NOW, THEREFORE, BE IT RESOLVED by the Winnebago County Board of Supervisors that the Table of Organization of Classified Positions for the Winnebago County Sheriff's Office is amended by eliminating five part-time Corrections Officer positions and adding five full-time Corrections Officer positions.
