# Winnebago County Health Department COVID-19 Data by School District Geographic Boundary

January 7, 2021

## Summary

- Since COVID-19 vaccine has arrived in Wisconsin, approximately 2,650 doses have been administered to Winnebago County residents as of January 6, 2021. Among those being vaccinated are healthcare workers and nursing home staff and residents. The health department received its first shipment of the vaccine this week and is working to vaccinate individuals that fall within [Phase 1a of the state vaccination plan](#).
- We're working to refer healthcare clinics, pharmacies and independent healthcare providers who are not affiliated with a healthcare system to community partners for vaccination. This includes pharmacy staff, dental clinics, EMS providers, testing and vaccination site staff, school nurses and others in [Phase 1a](#). If you feel you are eligible for Phase 1a and have not been offered the vaccine, please check with your employer on their vaccination plan. If you are an independent Phase 1a healthcare provider or you're a representative of a healthcare group with phase 1a employees and are not affiliated with a vaccine provider, please complete [this form](#).
- If you are using options to [shorten quarantine](#), be sure to continue to monitor your symptoms for a full 14 days, wear a mask, [social distance](#), and do not participate in group activities for the full 14 days. Shortened quarantine options may not be appropriate in all settings, such as high-risk, congregate settings. It's also recommended that close contacts who work at or attend daycares or K-12 schools follow the full, standard 14-day quarantine unless otherwise indicated by the school.
- **Stay at home.** Avoid gathering with anyone outside your home, especially those at [increased risk for severe disease](#), and get tested after a known or potential exposure to the virus or if you have any symptoms, even if they are mild.
- Safely [support local businesses](#). Use local curbside pickup and delivery to help support local service industries. When you seek goods and services, support businesses that engage in precautionary measures to keep our communities safe. If a business is not following safe practices, consider speaking with management or reporting your concern to the health department through this [form](#).
- Although we are seeing a decrease in reported cases and overall testing numbers in recent weeks, **our confirmed + probable case burden still remains very high**. Please continue to look at the weekly trends to best assess current case activity.
- Confirmed COVID-19 deaths have slowed down. One-quarter of the 155 confirmed COVID-19 deaths in our jurisdiction have occurred in the past 6 weeks.
- The confirmed + probable case rate over the past 2 weeks for our jurisdiction is 465.0 cases per 100,000 people, a decrease from the 498.7 cases per 100,000 last week. The number of cases (confirmed/probable) in the first week of this 2-week timeframe was 281/59 and for this most recent week is 263/112. Individuals aged 30-39 had the highest confirmed case rate of 518.9 per 100,000 over the past 2 weeks. Rates are lowest in those under 18 (190.8 per 100,000).
- Over this past week, 11.5% of [PCR tests in Wisconsin](#) were positive and 6.7% of PCR tests across all of Winnebago County were positive, which is still above our goal of remaining below 5% positivity. Many people with symptoms are only receiving antigen tests, which are excluded from our percent positivity calculation, leading to artificially lower percentages.
- Over the past two weeks, a daily average of 565 PCR tests were conducted among residents within the Winnebago County Health Department jurisdiction. Due to the holidays, testing availability was limited in the past two weeks. If you have been tested, please stay home until you receive your test results and follow the guidance provided.
- We continue to ask for the community's help with notification of [close contacts](#). Early notification and [quarantine](#) of exposed individuals is an important tool in limiting spread of COVID-19. View our website for updated [testing information](#). WI Department of Health Services encourages residents to download the [WI Exposure Notification app](#) to assist in notifying contacts of people who have tested positive for COVID-19.

## Background Information

This report provides *preliminary* data on the confirmed COVID-19 cases from December 23, 2020 – January 5, 2021. **A person is counted as a confirmed COVID-19 case if they had a positive confirmatory laboratory test (for example, polymerase chain reaction (PCR) tests or nucleic acid amplification tests (NAT) that detect genetic material of SARS-CoV-2, the virus that causes COVID-19). Antigen positive tests are counted as probable cases and are not currently included in the case count rates and graphs in this report.**

Dates utilized for all graphs and tables are based on test result date and may not represent final reported case counts. Data may be underreported for recent days because results can take multiple days to be reported to the health department. This means the number of tests and percent positivity may change in next week's report. As this is a weekly report for the past 14 days, there will always be a week of overlap between reports.

Data by school district geographic boundary may differ from data provided by the respective school district. School district geographic boundaries are the geographic area from which children are **eligible** to attend a certain school district. Data by school district geographic boundary includes cases among all individuals that live within that boundary regardless of age or where they attend school. In this report, data for school age children (5-17) does not differentiate between where they actually attend school or if they are homeschooled.

### For school district specific COVID-19 information:

- [Neenah Joint School District](#)
- [Omro School District](#)
- [Oshkosh Area School District](#)
- [Winneconne Community School District](#)

\*The COVID-19 data provided in this report is specific to the Winnebago County Health Department (WCHD) jurisdiction (population: 153,748). It does not include the portions of the City of Menasha or City of Appleton that fall within Winnebago County as those areas fall within the jurisdiction of the [City of Menasha Health Department](#) and [City of Appleton Health Department](#). With the increased amount of testing occurring in correctional facilities, starting October 3, 2020, data reports from the Winnebago County Health Department will not include test results from those living in Wisconsin Department of Corrections facilities, which includes the Oshkosh Correctional Institute. You can find testing data for the Wisconsin Department of Corrections on [this website](#).

Data provided on the [Department of Health Services website](#) may be different than the information provided by WCHD because the state reports data for the entire county based on address, which includes those portions of Menasha and Appleton as well as the correctional facilities.

- [Municipality Weekly Data Summaries](#)

## Confirmed Cases by School District Geographic Boundary for the Past Two Weeks (December 23 – January 5)

There have been 490 new confirmed cases reported in the past two weeks within the geographic boundaries of the Neenah, Omro, Oshkosh, and Winneconne School Districts. An additional 54 reported confirmed cases were reported within the geographic boundaries of other school districts that only partially fall within our jurisdiction.

School District	Case Count for past 2 weeks	Case Rate (per 100,000)	Burden**	Population***
Neenah Joint School District Area	154	345.3	High	44,601
Omro School District Area	22	285.8	High	7,697
Oshkosh Area School District Area	281	349.5	High	80,408
Winneconne School District Area	33	340.2	High	9,701
Winnebago County Health Department Jurisdiction	544	353.8	Very High	153,748
Winnebago County	679	401.0	Very High	169,926
Wisconsin	31,153	538.9	Very High	

\*\*Burden is based off of the case rate per 100,000 people in the past two weeks. To be consistent with the state's burden status categories, we have renamed our 'critical' category to be labelled 'very high'. See table below for more information on Burden Status for our county. Visit the DHS website for more information on this indicator <https://www.dhs.wisconsin.gov/covid-19/local.htm>

\*\*\*Population for school district was retrieved from <https://nces.ed.gov/programs/edge/TableViewer/acsProfile/2018> Winnebago County Health Department Jurisdiction does not include the portions of the City of Menasha and the City of Appleton that fall within Winnebago County.

Burden Status	Case Rate per 100,000 residents in the past two weeks	Neenah SD Area	Omro SD Area	Oshkosh SD Area	Winneconne SD Area
Low	Case rate is less than or equal to 10.	Less than 4 cases.	Less than 1 case.	Less than 8 cases.	Less than 1 case.
Moderate	Case rate is greater than 10, but less than or equal to 50.	Greater than 4 cases, but less than or equal to 22 cases.	Greater than 1 case, but less than or equal to 4 cases.	Greater than 8 cases, but less than or equal to 40 cases.	Greater than 1 case, but less than or equal to 5 cases.
Moderately High	Case rate is greater than 50, but less than or equal to 100.	Greater than 22 cases, but less than or equal to 45 cases.	Greater than 4 cases, but less than or equal to 8 cases.	Greater than 40 cases, but less than or equal to 80 cases.	Greater than 5 cases, but less than or equal to 10 cases.
High	Case rate is greater than 100, but less than or equal to 350.	Greater than 45 cases, but less than or equal to 156 cases.	Greater than 8 cases, but less than or equal to 27 cases.	Greater than 80 cases, but less than or equal to 281 cases.	Greater than 10 cases, but less than or equal to 34 cases.
Very High	Case rate is greater than 350, but less than or equal to 1000.	Greater than 156 cases, but less than or equal to 446 cases.	Greater than 27 cases, but less than or equal to 77 cases.	Greater than 281 cases, but less than or equal to 804 cases.	Greater than 34 cases, but less than or equal to 97 cases.
Critically High	Case rate is greater than 1000.	Greater than 446 cases.	Greater than 77 cases.	Greater than 804 cases.	Greater than 97 cases.

Number of cases for each Burden Status refers to the number of cases during a two-week time span.

## Number of Confirmed Cases and Rate per 100,000 People by School District Geographic Boundary in the Past Two Weeks (December 23 – January 5)

The highlighted cells for Neenah and Oshkosh School District Geographic Boundaries are colors associated with the burden status. Please see the table above for more information on burden status. This information is not provided for Omro and Winneconne School District Geographic Boundaries due to the small population size.

Age Group	Neenah SD Area		Omro SD Area		Oshkosh SD Area		Winneconne SD Area	
	# of cases	Rate per 100,000	# of cases	Rate per 100,000	# of cases	Rate per 100,000	# of cases	Rate per 100,000
<5	3	107.4	0	0.0	6	145.7	2	465.1
5-9	3	108.3	0	0.0	8	199.4	1	203.7
10-14	2	61.3	0	0.0	6	154.0	4	610.7
15-17	5	291.7	0	0.0	10	376.8	0	0.0
18-19	5	636.1	1	502.5	7	194.7	0	0.0
20-24	11	464.7	1	276.2	33	323.8	0	0.0
25-34	33	574.5	3	391.1	49	436.6	2	228.8
35-44	21	369.0	1	104.0	42	456.0	7	695.1
45-54	27	452.9	4	357.8	36	339.9	2	125.8
55-64	20	287.9	2	203.5	44	475.5	6	333.5
65-74	16	399.6	9	938.5	23	402.7	7	597.8
75-84	4	207.8	0	0.0	13	313.8	2	369.7
85+	4	627.9	1	578.0	4	221.1	0	0.0

Rate is determined by # of new confirmed cases during the past two weeks divided by population in the school district geographic boundary multiplied by 100,000. Rates can fluctuate greatly with small population sizes like Omro and Winneconne making it difficult to call out high rates. **Small population data may be more effectively looked at in a trend wise fashion.**

## Age Group Trended Over Time

The tables below show the biweekly confirmed cases counts by school district geographic boundary across the past 3 months.

The graphs on the following pages show how case rates by age group have changed over time for Oshkosh and Neenah School District boundaries. The first graph on each page shows the biweekly confirmed case rates per 100,000 residents. The second graph shows the cumulative confirmed case rates. Cumulative case rates will always trend upward, it is the rate of increase in that trend that helps us understand what populations are being impacted the most. Omro and Winneconne do not have similar graphs due to small population size and small confirmed case counts in these geographic areas.

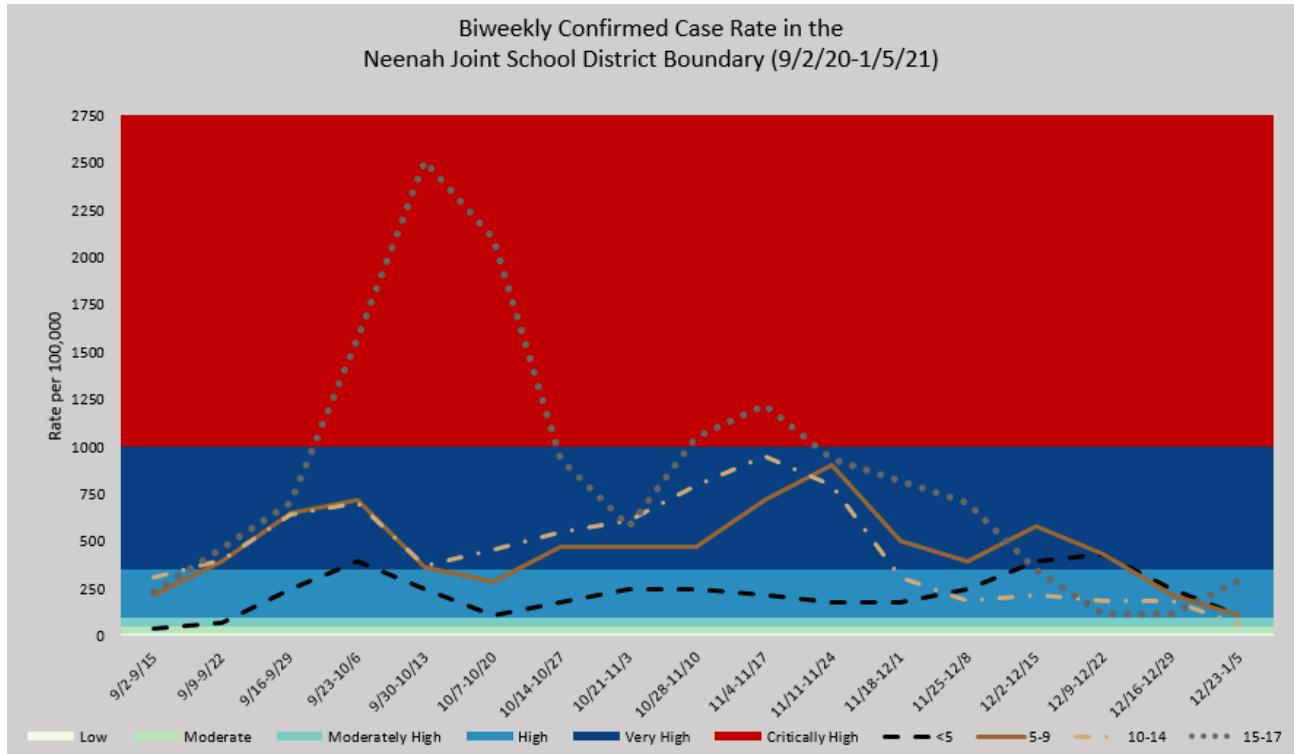

<b>OMRO SCHOOL DISTRICT AREA</b>				
<b>Biweekly Confirmed Case Counts for Select Age Groups in the Omro School District Boundary</b>				
<b>Week</b>	<b>&lt;5</b>	<b>5-9</b>	<b>10-14</b>	<b>15-17</b>
