

## Winnebago County Health Department Municipalities Weekly COVID Data Summary

November 12, 2020

#### Summary

- <u>Stay at home.</u> There are thousands of people currently infected with COVID-19 in Winnebago County and thousands more that have been exposed and may develop the disease. Many do not know they are infected and others are knowingly breaking isolation and quarantine. **Assume that every public place you are in has a risk of exposure to you.** Wear a mask, keep your distance at all times in public, and minimize your time in any indoor environment outside your home. Assume household members that are active outside of the home can infect you. Group gatherings and a lack of physical distancing in indoor spaces remain the most important contributors to the pandemic in this area.
- When you seek goods and services, support businesses that engage in precautionary measures to keep our communities safe. If a business is not following safe practices, consider speaking with management or reporting your concern to the health department through this <u>form</u>.
- Support local businesses. Use local curbside pickup and delivery to help support local service industries.
- <u>Deaths are on the rise</u>. Nearly one-third of the 75 confirmed COVID-19 deaths in our jurisdiction have occurred in the past 2 weeks.
- COVID-19 hospitalizations are at record levels across the state. In our region, **COVID-19 hospitalizations remain** dangerously high. As of 11/11/20, Fox Valley area hospitals had 134 COVID-19 patients hospitalized, a decrease from the 154 patients last week. <u>The Wisconsin State Fair Park Alternate Care Facility</u> currently has 11 patients.
- The confirmed case rate over the past 2 weeks for our jurisdiction is 1,119.4 cases per 100,000, an increase from the case rate of 1,027.0 per 100,000 for last week. The doubling time for our cases is 45.9 days. For all of Winnebago County, the case rate over the past 2 weeks is 1,233.0, and for the Fox Valley <u>HERC</u> region it is 1,218.2\*, putting both at a critically high burden level.
- The number of cases in the first week of this 2-week timeframe was 840 and for this most recent week is 881. Cases are now generally distributed throughout all jurisdictions and adult age groups. Individuals aged 25-29 had the highest confirmed case rate of 1,618.6 per 100,000 over the past 2 weeks. Rates are lower in those under 18 (510.9 per 100,000) and among young adults aged 18-24 (1,031.0 per 100,000).
- With much lower case rates in children in our area, some school districts are modifying current attendance models. Winnebago County Health Department is supportive of hybrid attendance models that keep students physically distanced and allow for at least some in-person instruction. We will continue to monitor case numbers to help ensure student and faculty safety. It is a balance we are learning more about as we go. Comments and concerns may be sent to health@co.winnebago.wi.us.
- Testing percent positivity is at 17.5% for the past 2 weeks which is still far from our goal of remaining below 5% positivity. Over the past two weeks an average of 693 PCR tests were conducted each day. The regional COVID-19 testing site at Sunnyview Expo Center in Oshkosh has averaged performing 501 tests per day over the past 2 weeks. Regional testing capacity is increasing with additional National Guard sites open in other counties. If you have been tested, please stay home until you receive your test results and follow the guidance provided.
- **Contact tracing capacity is significantly strained**. We are still able to reach out to all people who tested positive within 24-48 hours of being reported to the health department. Despite adding 31 full-time equivalent contact tracing positions to our health department, we are unable to provide contact tracing for all confirmed cases. If you have tested positive, please notify close contacts. Our contact tracers are focusing particularly on residents and staff in high consequence settings (long term care facilities, correctional facilities, etc.).
- <u>Older adults and people with underlying medical conditions</u> are most at risk and should take extra precautions to stay safe.

### **Background Information**

This report provides *preliminary* data on the confirmed COVID-19 cases from October 28 – November 10, 2020. A person is counted as a confirmed COVID-19 case if they had a positive confirmatory laboratory test (for example, polymerase chain reaction (PCR) tests or nucleic acid amplification tests (NAT) that detect genetic material of SARS-CoV-2, the virus that causes COVID-19). Antigen positive tests are counted as probable cases and are not currently included in the case count rates and graphs in this report.

Dates utilized for all graphs and tables are based on test result date and may not represent final case counts. Data may be underreported for recent days because results can take multiple days to be reported to the health department. This means the number of tests and percent positivity may change in next week's report. As this is a weekly report for the past 14 days, there will always be a week of overlap between reports.

\*The COVID-19 data provided in this report is specific to the Winnebago County Health Department (WCHD) jurisdiction (population: 153,748). It does not include the portions of the City of Menasha or City of Appleton that fall within Winnebago County as those areas fall within the jurisdiction of the <u>City of</u> <u>Menasha Health Department</u> and <u>City of Appleton Health Department</u>. With the increased amount of testing occurring in correctional facilities, starting October 3, 2020, data reports from the Winnebago County Health Department will not include test results from those living in Wisconsin Department of Corrections facilities, which includes the Oshkosh Correctional Institute. You can find testing data for the Wisconsin Department of Corrections on <u>this website</u>.

Data provided on the <u>Department of Health Services website</u> may be different than the information provided by WCHD because the state reports data for the entire county based on address, which includes those portions of Menasha and Appleton as well as the correctional facilities.

Northeast	98	1,026.1	Critically High	9,561	
Southeast	157	1,183.5	Critically High	13,287	
West	78 971.6 Very High		8,038		
Winnebago County Health Department Jurisdiction	1,721	1,119.4	Critically High	153,748	
Winnebago County	2,088	1,233.0	Critically High	169,861	
Wisconsin	75,765	1,310.6	Critically High		

\*\*Burden is based off of the case rate per 100,000 people in the past two weeks. See table on page 3 for more information on Burden Status for our county. Visit the DHS website for more information on this indicator at the state level <u>https://www.dhs.wisconsin.gov/covid-19/local.htm</u>

\*\*\*Population for municipality was retrieved from <u>https://doa.wi.gov/DIR/Final\_Ests\_Muni\_2020.pdf</u>. Winnebago County Health Department Jurisdiction does not include the portions of the City of Menasha and the City of Appleton that fall within Winnebago County but report to their own health departments.

\*\*\*\*Due to population size, the smaller municipalities were grouped together into rural regions (See map on pg. 3)

## Winnebago County Map by Regions

- West: Towns of Nepeuskun, Poygan, Rushford, Utica, Winchester, and Wolf River
- Northeast: Towns of Clayton, Neenah, and Vinland
- Southeast: Towns of Algoma, Black Wolf, Nekimi, and Oshkosh
- Central: City of Omro, Towns of Omro & Winneconne, and Village of Winneconne

Number of Confirmed Cases and Rate per 100,000 People for Select Municipalities in the Past Two Weeks (October 28 – November 10)

	City of Neenah		City of Oshkosh			Village of Fox Crossing			
		Rate			Rate			Rate	
Age	Number	per		Number	per		Number	per	
Group	of cases	100,000	Рор.	of cases	100,000	Рор.	of cases	100,000	Рор.
<18	35	551.4	6,347	58	490.0	11,836	17	444.4	3,825
18-24	26	1,394.8	1,864	117	902.6	12,962	25	1,434.3	1,743
25-29	23	1,275.7	1,803	88	1,672.7	5,261	24	1,596.8	1,503

60-69	36	1,314.3	2,739	85	1,502.3	5,658	23	1,100.0	2,091
70-79	17	1,098.9	1,547	43	1,340.0	3,209	13	1,059.5	1,227
80+	25	2,699.8	926	30	966.2	3,105	15	2,427.2	618
Total	312			759			201		

Burden Status	Case Rate per 100,000 residents in the past two weeks	City of Neenah	City of Oshkosh	Village of Fox Crossing
Low	Case rate is less than or equal to 10.	Less than 3 cases.	Less than 7 case.	Less than 2 cases.
Moderate	Case rate is greater than 10, but less than or equal to 50.	Greater than 3 cases, but less than or equal to 13 cases.	Greater than 7 case, but less than or equal to 33 cases.	Greater than 2 cases, but less than or equal to 10 cases.
Moderately High	Case rate is greater than 50, but less than or equal to 100.	Greater than 13 cases, but less than or equal to 26 cases.	Greater than 33 cases, but less than or equal to 67 cases.	Greater than 10 cases, but less than or equal to 19 cases.
High	Case rate is greater than 100, but less than or equal to 350.	Greater than 26 cases, but less than or equal to 92 cases.	Greater than 67 cases, but less than or equal to 233 cases.	Greater than 19 cases, but less than or equal to 67 cases.
Very High	Case rate is greater than 350, but less than or equal to 1,000 cases	Greater than 92 cases, but less than or equal to 263 cases.	Greater than 233 cases, but less than or equal to 666 cases.	Greater than 67 cases, but less than or equal to 191 cases.
Critically High	Case rate is greater than 1,000.	Greater than 263 cases.	Greater than 666 cases.	Greater than 191 cases.

Case rate is determined by number of new confirmed cases during the past two weeks, divided by population in the municipality, multiplied by 100,000. Rates can fluctuate greatly with small population sizes making it difficult to call out high rates. Burden Status will only be provided for City of Neenah, City of Oshkosh, and Village of Fox Crossing due to population size. Number of cases for each Burden Status refers to the number of confirmed cases during a two-week time span.

## Confirmed Case Rate Trends by Municipality

The graphs below show confirmed case rate per 100,000 people by municipalities. These case rates are based on confirmed case counts during a two-week time span.

\*\*\*\*Due to population size, the smaller municipalities were grouped together into the following rural regions (See map on pg. 3)

- West: Towns of Nepeuskun, Poygan, Rushford, Utica, Winchester, and Wolf River
- Northeast: Towns of Clayton, Neenah, and Vinland
- Southeast: Towns of Algoma, Black Wolf, Nekimi, and Oshkosh
- Central: City of Omro, Towns of Omro & Winneconne, and Village of Winneconne

# Active Cases and Total Number of Confirmed Cases by Municipality (3/11/20-11/11/20)

A person is counted as an active COVID-19 case if they had a positive confirmatory laboratory test (for example, a test that detects the virus in the nose or throat) and are currently in isolation and being followed by a disease investigator.

Municipality	Active Ca	Total Cases	
	Number of Active Cases	Percent	Total Number of Confirmed Cases
City of Oshkosh	534	13%	4,008
City of Neenah	213	16%	1,370
Village of Fox Crossing	141	13%	1,052
City of Omro	31	10%	307
Town of Algoma	53	13%	414
Town of Black Wolf	21	14%	146
Town of Clayton	35	14%	254
Town of Neenah	24	13%	188
Town of Nekimi	14	17%	81
Town of Nepeuskun	5	11%	44
Town of Omro	23	16%	145
Town of Oshkosh	22	15%	143
Town of Poygan	7	11%	63
Town of Rushford	13	14%	92
Town of Utica	6	8%	74
Town of Vinland	14	18%	80
Town of Winchester	14	12%	117
Town of Winneconne	12	7%	162
Town of Wolf River	3	4%	78
Village of Winneconne	12	7%	173
	Rural Regions*	***	
Central	78	33%	787
Northeast	73	22%	522
Southeast	110	20%	784
West	48	31%	468
Winnebago County Health Department Jurisdiction	1,197	13%	8,991
Wisconsin	64,067	22%	285,828

- Data is suppressed for municipalities with fewer than five active confirmed cases.
