PLANNING PROCESS

The following information is made available as a part of the annual 2021 Budget planning process for the Winnebago County Department of Human Services. It is the intent to invite and consider the public's input as part of the Department's annual budget planning process which begins in June and culminates in November with the County Board Budget approval. It should be noted that some aspects of the planning process occur continually throughout the year at the Winnebago County Human Services Board's regular monthly meetings. The exact times and locations of meetings can be obtained by contacting the Department of Human Services at (920) 236-1185 or the Winnebago County Clerk's office at (920) 236-4888. Additional information is available on the Winnebago County web-site: <http://www.co.winnebago.wi.us/county-clerk/meetings>

This year's planning process will again include public forums, which will be held either virtually, or within the major population centers on June 17 and 18, 2020. For your reference, the first page of this booklet provides information on the time and information regarding the location of hearings. Individuals wishing to participate in these public forums are encouraged to do so and will have an opportunity to speak to the Department of Human Services Board. If special considerations regarding accessibility and/or translators are required, please contact Pam at the Department of Human Services at (920) 236-1185.

Individuals who are unable to attend a forum during these times are encouraged to send written comments to the Department of Human Services offices. Such comments can be directed to:

Board Chairperson
Winnebago County Department of Human Services
PO Box 2187
Oshkosh WI 54903-2187
or via e-mail to: dhs@co.winnebago.wi.us

VISION STATEMENT

To be a leader in Human Services by fostering healthy, self-reliant and productive individuals and families.

MISSION STATEMENT

To serve our clients with professional, trauma informed quality and cost-effective services that focus on prevention, protection, mental health, family integration, self-determination, and recovery with respect for and in partnership with individuals, families, caregivers and the community.

HUMAN SERVICES

Target Population Description

Abused and Neglected Children – Includes a consumer and his family who is, or is alleged to be, abused or neglected as defined in Wisconsin Statutes, or is at the risk of being abused or neglected. This definition includes physical abuse, sexual abuse, neglect and emotional damage.

Adults and Elderly - Includes consumer age 18 or over whose services are directed at the improvement of physical and social functioning, assistance with daily living and preservation or restoration of the ability to live in a homelike environment and participate in community activities. This program includes frail, elderly and others, aged 65 and older, who are being served for reasons other than alcohol and other drug abuse, developmental disabilities or mental illness

Alcohol and/or Other Drug Abuse - Includes persons that uses alcohol and/or another chemical substance that has mind-altering effects to the extent that it interferes with or impairs physical health, psychological functioning, or social or economic adaptation, including occupational or educational performance and personal or family relations. It also includes a person whose use of alcohol and/or other drugs has resulted in a conviction for operating a motor vehicle while intoxicated, a Department of Transportation referral for an assessment to determine the existence of an AODA disability, or participation in the Drug Court Initiative. Other included activities are services to the community for the prevention of alcohol/drug abuse, identification of persons in need of AODA treatment and informing the public of services available.

Children and Family - Includes a child or family member(s) who has service needs not specified in the other target population categories. Response actions may include those directed at improving family functioning and referrals to community services targeted to address specific needs for children and families.

Developmental Disability - The program is delivered to persons who have a disability attributable to brain damage, intellectual disability, cerebral palsy, epilepsy, autism, or another neurological condition closely related to intellectual disability or requiring treatment similar to that required for intellectual disability, which has continued or can be expected to continue indefinitely and constitutes a substantial handicap to the afflicted individual.

Youth Justice - The program provides case management services to assist youth and families in overcoming adolescent behavior problems such as delinquency, uncontrollability, run away, or truancy which have resulted in Youth Court intervention.

Mental Health - The program is delivered to persons who are serviced for the purpose of treating mental illness or its personal or social effects. The objective of treatment and other services is to ameliorate the effects of mental illness and improve the ability of consumers to function in personal, social and vocational roles. The Mental Health Target Population covers persons with chronic mental health problems, including both adults with chronic mental illness and children and youth with severe emotional disturbance who are unable to perform essential personal and social roles appropriate to their age, and who require or receive personal assistance or supervision to carry out activities of daily living or to participate in community living.

Physical and Sensory Disability - The program is delivered to persons under age 65 who have a physical disability which impairs their mobility, or are blind or visually impaired, or are deaf or hard of hearing and receive services to assist them to achieve their maximum level of functioning and independence in social roles, and to fully access and participate in community life. The target population also includes programming designed to identify persons in need of services and to prevent physical disabilities.

Economic Support - Represents Winnebago County and citizens of the East Central Income Maintenance Partnership (Calumet, Green Lake, Kewaunee, Manitowoc, Marquette, Outagamie, Waupaca, Waushara, Winnebago) who due to personal economic situations qualify for state or federal economic programs to include Medicaid/Badger Care, Child Care assistance and Foodshare.

HUMAN SERVICES

Service Category Description

Child Day Care – Crisis/Respite - Services to children that includes care in settings such as a day care center, the home of another, or in their own home. The purpose of these services is to meet crisis or respite needs, prevent or remedy abuse or neglect, alleviate stress in the family, or preserve the family unit.

Community Living/Support Services - Services providing support to consumers in order to maintain a natural living arrangement or aid in the adaptation to physical or communicative barriers. Skill development, adult day care, meal programs, respite care, interpreter services, adaptive equipment, housing and energy assistance, protective payment/guardianship, and the coordination of services.

Community Prevention, Access and Outreach - Services to at-risk population in the community to include persons likely to have a problem which can potentially be alleviated by the delivery of human services; handling individual inquiries for help; providing accessibility to community health programs; providing advocacy and providing prevention activities to enhance the physical health and improve social and community functioning by making constructive changes in community conditions; and providing public information and referral services to satisfy inquiries; and to identify specific resources in the human services delivery system.

Community Residential Services - Services to consumers in licensed adult family homes, child foster homes, group homes, shelter care and community-based residential facilities.

Community Support Program - The provision of a network of coordinated care and treatment services to adults with serious and persistent mental illness and to chronic alcoholic consumers. These services may occur in natural or supportive service settings delivered by an identified provider to ensure ongoing therapeutic involvement, reduce the disabling effects of mental illness or alcoholism and assist consumers to access and participate in the community.

Community Treatment Services - The provision of treatment services in outpatient medical settings, as well as supervision of juvenile justice consumers in the community and occupational and physical therapy, speech and language therapies. Services delivered in a mental health outpatient setting include treatment for the purpose of ameliorating the effects of various mental disorders and to improve personal, social and family functioning. Services delivered to youth in the juvenile justice system under formal or informal supervision or in restitution programs. Services are designed to monitor behavior, prevent continued delinquent activity, strengthen family ties, assist in successful involvement in the community and fulfill any obligations ordered by the court or other juvenile justice agency. AODA treatment services are designed to improve personal, social, vocational and family functioning and prevent further deterioration of physical health.

Comprehensive Community Services - Comprehensive Community Services (CCS) provides programming to people of all ages -- youth to elderly -- living with either a mental illness and/or substance use disorder. CCS is for individuals who need ongoing services beyond occasional outpatient care, but less than the intensive care provided in a hospital setting. The individual works with a dedicated team of service providers to develop a treatment and recovery plan to meet the individual's unique needs and goals.

Inpatient and Institutional Care - Services delivered in settings such as state mental health institutes, centers for developmental disabilities, general hospitals, CBRF's certified as inpatient treatment programs, residential care centers and juvenile correctional institutions. Inpatient treatment is for the purpose of providing treatment of mental and substance abuse disorders and restoring health, personal and social functioning. Also includes IMD (Institution for Mental Diseases) licensed nursing homes to persons with severe mental illness.

Investigations and Assessments - Services to consumers that includes screening, assessment, diagnosis, case planning or determining the existence or nature of a specific problem. Services include child abuse and neglect investigations, reports to the court required under Chapters 48, 51 and 55 Wisconsin Statutes, consumer intake assessments and activities related to procedures established by juvenile court guidelines.

Specialized Transportation - The provision of transportation and transportation related supervision to the elderly, handicapped or other persons with limited ability to access needed community resources. Includes transportation centered on improving a person's general mobility and ability to perform daily tasks independently such as shopping, visiting with friends, competitive employment, etc.

Supported Employment - Supported Employment is competitive work in an integrated work setting for individuals who, because of their handicaps, need ongoing and/or intensive support services to find and perform this work.

Supportive Home Care - The provision of services to maintain consumers in independent or supervised living in their home or the home of their friends or relatives that help them meet their daily living needs, ensure their well-being and/or reduce the likelihood that they will be placed into alternate living arrangements. Services may include, but are not limited to, household care, personal care and supervision. Includes supervised apartment living, senior companion activities, telephone reassurance, friendly visiting and home health care.

Work Related and Day Services - Services delivered for the purpose of promoting vocational participation and self-sufficiency. Services include vocational counseling or activities that promote participation in work or job placement services. Also included is day center services to persons to develop skills necessary for community living.

ADMINISTRATIVE SERVICES DIVISION

Administrative Services encompasses a range of responsibilities, which provide the overall leadership and management of the Department of Human Services. Administrative Services ensure that the programs and objectives of the Department are developed and maintained in accordance with the philosophies and objectives of the Winnebago County Board of Supervisors and County Executive. In addition, the Administrative staff ensures that the programs of the department are carried out in a cost efficient manner, ensuring that all mandated state and federal human service programs are delivered in accordance with established requirements.

Administrative Services include:

- Provide support to financial and service programs of the department.
- The development of the mission, infrastructure and operating procedures for the department.
- Compliance with state, federal, local laws and regulations.
- The provision of establishing long-range goals and directions for the department in preparing and implementing strategic planning.
- Preparation, monitoring and management of the department's annual operating budget.
- The negotiation of annual contracts with service providers.
- Provide field, phone and clerical support for Human Service professional staff.
- Continually evaluating needs to move forward in incorporating technology for the department.
- Manage staff security to client database tracking systems.
- Implement new State initiatives.
- Maintain a high level of competent customer service.
- Continually working towards paperless systems.
- Preparing the Human Service portion of the County's Civil Rights Plan.
- Encouraging policies and procedures within Human Services to be written, spoken and implemented in a trauma informed manner.

BEHAVIORAL HEALTH SERVICES DIVISION

The Behavioral Health Division is divided into two programs:

- Alcohol and Other Drug Abuse Services
- Mental Health Services and Community Programs

ALCOHOL AND OTHER DRUG ABUSE SERVICES

Alcohol and other drug abuse can best be defined by understanding our service system philosophy. Our stated philosophy is:

We believe that alcoholism and other drug dependency is a disease which, left untreated, robs individuals of a happy, fulfilling life, and ultimately can result in death. This disease is characterized by dependency on alcohol/drugs to the extent that the individual's health is impaired or endangered, and his or her social and/or economic functioning is disrupted. We believe that alcoholism and other drug abuse/dependency are treatable illnesses, and that individuals who are suffering from, or adversely affected by these illnesses, should be afforded and have the right to obtain prompt, quality care and counseling. We recognize and accept that relapses are part of this chronic disease and such relapses should not be used in any way to foster shame or guilt.

The AODA service system is a blend between *contracted* and *county operated* services. Between the two, a full continuum of care exists from prevention to inpatient services.

CONTRACTED SERVICES:

Outpatient Service

Outpatient services are organized nonresidential recovery services provided to persons with a substance related disorder in regularly scheduled individual or group therapy sessions.

Residential Service

Residential services are provided in community based residential facilities (CBRF) as well as adult family homes and group homes licensed and certified by the State Department of Health Services. Residential services are designed to serve persons who are in need of a safe and stable living environment in order to develop sufficient recovery skills. Residential services are of two types – extended care and transitional.

Inpatient Service

Inpatient Services are medically monitored, or medically managed services, provided in a community based residential facility (CBRF) or a hospital.

Detox/ER/Physician

Detoxification services are designed to achieve safe and comfortable withdrawal for alcohol and drugs. Detox can be provided in various settings including hospitals, community based residential facilities, or home.

Other

On occasion, expenses associated with an ambulance/police transport of an individual between hospitals are paid by our department.

COUNTY OPERATED SERVICES:

The Department of Human Services provides a wide range of services that are designed to prevent problems; offer assistance to those trying to access services, and to those in crisis; and provide specialty residential services to those with a serious and persistent mental illness and an alcohol/drug disorder.

Prevention Services

Since the early 1980's, our department has operated a prevention service. Over the years a variety of strategies were used, all designed to offer the community-at-large better and more accurate information about alcohol and drugs, so more informed decisions could be made by individuals choosing whether or not to use any mood-altering chemical.

Assessment and Intervention Services

Seven (7) full-time equivalent AODA counselors/case managers act as the county's single point of entry for AODA and OWI (operating while intoxicated) services, including our SSTOP initiative, Justice Programs, drug court outpatient services, etc. The counselors assess, authorize and case manage individuals in need of alcohol and/or drug treatment services. Walk-in assessment services are an option for the non-drunk driver. Walk-in services are available daily in Oshkosh and on Tuesday and Thursday in the Neenah clinic.

Outpatient Services

While limited at this point, it is expected that our current department staff will provide some outpatient services for adults and children/adolescents. At this time, service capacity in the private sector can be an issue especially when considering payment source.

Drug Court

This initiative was implemented in 2006 and is designed to offer non-violent substance dependent offenders an opportunity to successfully complete alcohol/drug treatment as

an alternative to incarceration. The program is intended for Winnebago County residents whose crimes were motivated because of their addiction problem. This initiative is a collaborative effort among many stakeholders (courts, treatment providers, prosecutors, defense attorneys, law enforcement including our Sheriff's Office, and others).

MENTAL HEALTH SERVICES

Our Mental Health Program, which includes Community Services, is guided by the principles of consumer recovery and least restrictive placement; that individuals can improve and recover from their mental or emotional condition; and recipients of services must be involved in developing their treatment plan and their service/care decisions.

The division provides a full range of mental health services, either directly with county staff or through contract agencies.

CONTRACTED SERVICES:

Inpatient Services

Inpatient services are medically managed services provided in a general or specialty hospital. Both acute care and long-term inpatient services are available within our continuum of care.

Residential Services

Residential services are generally transitional in nature and provided in licensed community based residential facilities (CBRF's), adult family homes and group home care. These services focus on and provide a variety of habitation or rehabilitation services to assist the consumer in developing the necessary skills to return to independent living.

Vocational Services

Vocational services are utilized to assist consumers in maximizing their work potential and to provide some economic self-sufficiency.

OPERATED SERVICES:

Community Support Program Team

The purpose of this team is to provide comprehensive community based care in the least restrictive environment consistent with individualized needs. Services include psychiatric evaluation, medication prescription and monitoring, supportive counseling, psychosocial rehab to help with daily living skills, vocational involvement, etc.

Family Services Team

This team works with children and their families who are court ordered into treatment due to abuse, neglect, or delinquent behavior. Their goals are to help families stay intact

whenever possible, reunite if separated, and reduce the possibility of out-of-home placement.

Beginning in 2008, eligible children served by this team were enrolled in the Comprehensive Community Service program. In 2009, an intensive in-home treatment team (therapist and case manager) was established. In 2013 a second Team was added, and in 2015 a third intensive in-home team was added. There are three social workers dedicated to Youth Community Services programs. In 2018, Coordinated Services Teams were added as a strength based, coordinated system of care, driven by a set of core values to deliver support and services.

Psychotherapy Team

This team generally works with individuals with or without insurance, including MA, that are at or below 200% of Federal Poverty Limit (FPL). Families are often overwhelmed emotionally needing intervention and support. The goal is to lessen distress and family conflict. Access to services can be via our Walk-in clinic which is operational daily from 8:00 a.m. to 3:00 p.m. in Oshkosh, and Tuesday and Thursday 8:00 a.m. to 3:00 p.m. in Neenah.

Case Management Team/Comprehensive Community Service Team

This team's services include psychiatric evaluation; medication prescription and monitoring; supportive psychotherapy; assistance with activities of daily living; vocational assessment and support; crisis management, a range of care similar to Community Support Program, but to a somewhat lesser disabled consumer. In 2014, three (3) positions were transferred from the Child Welfare Division and added to our Family Services Team to deal with the needs of our youth in need of CCS services. Also in 2014, Winnebago County joined with four (4) other counties in the region to form a CCS Regional Consortium. In 2018, there are six (6) counties in the consortium.

Crisis Services

Our department's Mental Health/AODA crisis service system has various components: a mobile crisis component which operates 16 hours per day; and the below referenced phone service which is in operation 24 hours per day, 365 days per year. An on-call pager system is currently available thus offering 24 hour per day mobile response. In 2018, two crisis specialist positions were added for evening hours focusing on children and family in preventing disruptive out of home placements and hospitalizations.

Residential Services

In the fall of 2019, we began building a 16-bed residential facility thus merging Summit House and Toward Tomorrow into one facility. Our new crisis center was licensed on March 27, 2020. We moved clients and staff from the other facilities on March 30, 2020.

The new facility is called the Winnebago County Crisis Center (WCCC) and is located at 684 Butler Avenue, Oshkosh. These services are designed specifically for adults experiencing a crisis situation that does not require a hospital admission, but cannot be safely resolved in the person's home. In addition, this facility houses our department's 24-hour Crisis Intervention/Helpline telephone service and the majority of our mental health crisis specialist staff.

CHILD WELFARE SERVICES DIVISION

Access/Initial Assessment Services

The Access team is the starting point where requests for child protective services are taken and evaluated. Initial screening, intake, information and referrals are provided. The Initial Assessment unit completes assessments of abuse or neglect of children. Information and referral to community services is an additional part of this team's response to calls from the community. Cases requiring ongoing services are referred to the Child Protective Services team within the agency who is responsible for ongoing services.

Child Protective Services

Child Protective Services teams work with families experiencing a variety of problems. These problems may include child abuse or neglect, mental health issues, money management issues, domestic violence, or alcohol and drug abuse.

When it becomes necessary for Child Protective Services to intervene in a family, the main consideration is the safety of the children within the family structure. Services are provided to the entire family as a unit, with a focus on reducing or eliminating the problems that influence the immediate safety of the children. Family-focused intervention is designed to preserve the family unit when appropriate. It attempts to build on the strengths of the family members to prevent breakup. This type of service focuses on the underlying issues, rather than the obvious symptoms that brought the family to our attention.

Services available to families involved with the county Child Welfare service system include individual, family and group counseling; in-home parent training; home management training; budget counseling; a variety of support services for parent and child, advocacy and permanency planning for children. Staff on these teams work closely with the legal and court system in an effort to reinforce the importance of providing a safe and nurturing environment for children. Staff make referrals to area service providers, such as hospitals, counseling clinics, AODA resources, mental health facilities and family training services. Child Protective services work involves placement of some children into

foster homes or Residential Care facilities. Team social workers provide case management services in these cases.

Juvenile Intake Services

Juvenile Court Intake serves the county agency and county legal court system by screening all child and youth referrals submitted by the Department of Human Services, the police departments, schools, parents and other child serving agencies. It functions under the guidelines authorized by the circuit courts. Juvenile Court Intake prepares and makes recommendations to the county legal system at all secure and non-secure custody review hearings.

The Juvenile Restitution Program is provided where youth offenders can compensate their victims and the community through dollars earned or community service.

Youth Justice Services

Youth Justice Services teams work with families experiencing problems, which may include juvenile delinquency, or a child who is chronically truant or a runaway.

When Youth Services intervenes in a family due to the actions of one member, services are provided to the family as a unit, rather than just the individual, whenever possible. The goal of this family-focused approach is to assist families in overcoming problems that may, at times, influence negative behaviors in one or more family members. This type of approach addresses the underlying problems contributing to the disturbance and emphasizes the integrity and well-being of the family.

Services include background social studies for the court; individual, family and group counseling; family training; home management training; budget counseling; and advocacy. Team workers make referrals to and coordinate services with area service providers such as hospitals, counseling clinics and chemical dependency programs. Case management services are also provided to youth and families should out-of-home placements into foster care, group home care, Residential Care facilities, or Correctional facilities become necessary.

The Youth Justice teams coordinate the Bridges Truancy Program, which is an effort to divert from the court system, youth who are chronically truant, but otherwise not delinquent. A positive approach to dealing with the truancy is utilized, rather than attempting consequences through the Juvenile Court system.

Placement Resource Team Services

The Resource Team administers and supervises placements and services for children and youth. The Resource Team oversees Child Substitute Care and Kinship Care. Child Substitute Care Services provides the recruitment, training and licensing of foster parents and supervises the placement of children in foster homes, group homes and institutions.

The main emphasis of substitute care services is to provide temporary, short-term placement for children while treatment and rehabilitation efforts are made in order to reunite the natural family. Independent Living Skills are assessed and enhanced for youth 14 years of age and older.

Resource Support Team Services

The Resource Support Team provides Home Consultant services and permanency assistance to the other teams. This team partners with families to resolve family conditions that resulted in child welfare involvement. They provide direct support such as parenting, crisis intervention, money management skills, resources and guidance to meet basic needs, and visitation supervision. This team provides support for children and youth to achieve permanency.

ECONOMIC SUPPORT SERVICES DIVISION

The Economic Support Team is comprised of Economic Support Specialists and Support Staff who process applications and changes for Medicaid, Badger Care, Foodshare and Child Care Assistance cases. They staff a call/change center for our East Central Income Maintenance Consortium along with agents from Calumet, Green Lake, Kewaunee, Manitowoc, Marquette, Outagamie, Waupaca and Waushara counties. The ESS workers also work with the Aging and Disability Resource Center to determine eligibility for the Family Care and IRIS programs.

LONG TERM SUPPORT SERVICES DIVISION

Teams within the division support people with disabilities and their families with a long term support need. They provide information, assistance and benefits and options counseling to seniors and adults with intellectual and/or physical disabilities. This includes assisting eligible persons with nutritional and transportation needs.

The Long Term Support Division also provides adult protective services such as elder abuse investigation/interventions, conservatorships, protective placements and reviews, guardianships, and durable power of attorney for finances and health care.

The division also provides Service Coordination for children with disabilities. In addition, the Long Term Support Division oversees services provided by a contracted agency for Birth to Three/Early Intervention services.

Family Support Team

The staff of this team helps families and individuals, typically aged birth to eighteen, and for some individuals, to age twenty-two. The goal is to help a family better meet the needs of a son or daughter with a disability, as well as, supporting parents as caregivers. Staff helps families and individuals connect with community resources, navigate the services and school systems, assist with locating and contracting with community-based resources, and/or arrange funding to purchase individualized services and supports. They can help a person's transition from school to adult services. This team also collaborates with other Human Service divisions to support children through the Children's MA Waiver Program.

A Children's Voluntary Services Advisory Committee assists in developing the Children's Community Options Program (CCOP) plan and monitoring this program as well as serving as the Birth to Three Interagency Coordinating Council. This committee also includes voluntary Behavioral Health services for children.

Aging and Disability Resource Center (ADRC)

The ADRC is a resource center that provides the following services:

- Information and Assistance to the general public about services, resources and programs, as well as, connect people with those services.
- Long Term Care Options Counseling to offer consult and advice about the available options to meet individual's long term care needs.
- Benefits Counseling assists individuals by providing accurate and current information on private and government benefits and programs.
- Prevention and Early Intervention efforts are intended to keep people healthy and independent.
- Access to the Family Care benefit is the responsibility of the resource center determine eligibility and to enroll eligible, interested members in a Managed Care Organization or the self-directed IRIS program.
- Access to the Family Care benefit Assessment and Eligibility processing for Wisconsin's Long Term Care Medicaid Programs Family Care and IRIS is the responsibility of the ADRC. Staff determine eligibility and enroll eligible, interested members in the Family Care program with a Managed Care Organization (MCO) or the self-directed IRIS program with an IRIS Consultant Agency (ICA).
- The Dementia Care Specialist supports people with dementia and their caregivers to access resources that promote the highest quality of life possible while living at

home. Increasing awareness and understanding of dementia in our community is also a priority.

The goal of these services and programs is to give seniors and adults with disabilities options and support so they may remain independent, contributing, and participating members of the community in which they live.

The Winnebago County ADRC Committee, which also serves as the Commission on Aging, advises the services at the county level. The Winnebago County Aging Services are a part of the ADRC. Aging services are specifically designed to enhance nutrition, health and wellness for all individuals 60 years and older within our communities through the Older American Act. Specialized transportation funding is managed within the Long Term Support division.

The provision of Adult Protective Services is also within the ADRC. APS Staff provide Adults at Risk and Elder Abuse investigations/interventions and work with individuals, community resources and the courts in coordinating adult protective services, including guardianships of person and/or estate, spendthrift guardianships, emergency protective placements and reviews, creation of Power of Attorney documents and developing supported decision making documents with consumers and their family.
