DISCLAIMER OF WARRANTIES AND ACCURACY OF DATA:

Although the data presented have been produced and processed from sources believed to be reliable, no warranty, expressed or implied, is made regarding accuracy, adequacy, completeness, legality, reliability or usefulness of any information contained within this plat book. The data used to create the maps, indexes and other copy is a compilation of records, information and data from various city, county and state offices and other sources and should be used for reference only. This plat book is only intended for use as a general reference for the public.

The maps presented are representations and are not intended for legal, survey, or other related uses. Data can quickly become out-of-date due to the dynamic nature of property sales and transfers. Please be aware that changes may be periodically made to the information contained herein and these changes may or may not be incorporated in any subsequent versions of the publication. The documents published in this book could contain technical inaccuracies or typographical errors. Therefore, careful attention should be given to the contents of any data associated with this plat book. If you have any comments or would like to report errors and/or omissions, please report them to the Winnebago County Land and Water Conservation Department at (920) 232-1950 or mailed to 625 E. County Road Y, Suite 100, Oshkosh, WI 54901-8131.

All such violations will be prosecuted to the limit of the applicable copyright laws. This applies to ALL users of this book, as well as any printer, photocopier or other person making copies.

DISCLAIMER OF LIABILITY:

Neither Winnebago County, Wisconsin and its Departments, nor any of its employees or any other entity from whom data was obtained shall be held liable for any improper or incorrect use of the information described above and/or contained herein and assumes no responsibility for anyone's use of the information. In no event shall the County of Winnebago, its Departments, nor any of its employees or any other entity from whom data was obtained nor their employees be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, procurement or substitute goods or services; loss of use, data, or profits; or business interruption) however caused and on any theory of liability, whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use of this information, even if advised of the possibility of such damage. This disclaimer of liability applies to any damages or injury, including but not limited to those caused by any failure of performance, error, omission, interruption, deletion, computer virus, theft or destruction or unauthorized access to, alteration of, or use of record, whether for breach of contract, tortuous behavior, negligence or under any other cause of action.

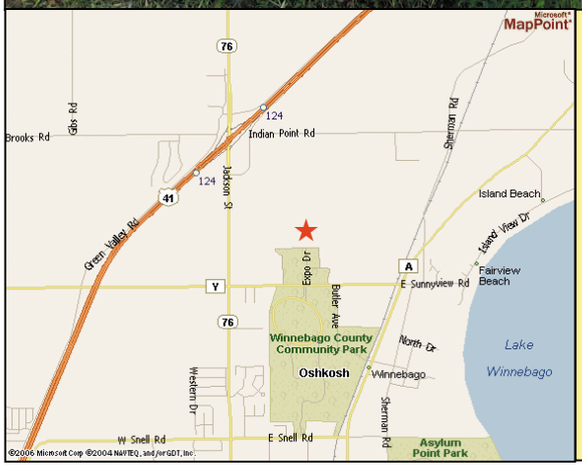
Rain Garden

What is a Rain Garden?

Rain gardens are landscaped areas or features (usually shallow excavations – 4-8" in depth) that allow rain water to soak into the ground (rather than runoff). Rain gardens are typically located to receive rain water from home or building roof downspouts. Native vegetation is planted into the rain garden to increase the amount of water soaking into the ground. After a storm, the rain garden fills with a few inches of water which is slowly infiltrated into the ground.

Why are Rain Gardens important?

- Water soaking into the ground recharges groundwater/aquifer.
- Lessens flooding and drainage problems.
- Improves water quality.
- Enhances the beauty of yards and neighborhoods.
- Provide habitat for birds and butterflies.



Visit the Winnebago County Rain Garden at: the Sunnyview Expo Center and Fairgrounds adjacent to the Expo building entrance (500 East County Road Y, Oshkosh, WI) and build one at your home!

Offshore Breakwaters

What is an offshore breakwater? A rock structure located offshore for the purpose of diminishing the force of the waves and ice for protecting the shoreline from erosion.

Benefits of offshore (rock structures) breakwaters:

- Prevents the loss of shoreline and wetland erosion from wind, wave, and boat action.
- Increase in water quality.
- Protects and restores wetlands for flood control.
- Protects and restores important fish and wildlife habitat.

* To date approximately 900 acres of lake adjacent wetlands have been protected and restored on the Winnebago System with the installation of offshore breakwaters.

Are You In A Priority Watershed?

The Fond du Lac River / Winnebago West Priority Watershed Project and the Pine River / Willow Creek / Poygan South Priority Watershed Project are part of a larger state program designed to clean up and protect our waters. This program provides financial and technical help to landowners, local governments and businesses who adopt land management practices that reduce erosion and polluted stormwater runoff.

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

B (NW)	A (NE)
C (SW)	D (SE)

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

B (NW)	A (NE)
C (SW)	D (SE)

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

Ownership Index

This index shows the name of the landowner, the section and page number. Small tract owners are not labeled on township maps. However, they are designated by the quarter section (A, B, C, D) or government lots (GL).

Information About Land Descriptions

A "Land Description" is how a tract or parcel of land is delineated, such that the description shows exactly where it is located, how it is bounded, and how many acres it contains. This description is done in terms that are legally accepted and defined.

Most commonly, land is described using a grid system known as the Public Land Survey System (PLSS). This is most effective with rectangular shaped tracts. Odd shaped tracts can be described using Metes and Bounds.

The Public Land Survey System (PLSS) or the Rectangular Survey System is used for over half of the United States. Each grid cell represents approximately 36 square miles. In creating the PLSS the government divided the land into Townships, each of which was to be 36 miles square (6 miles tall and 6 miles wide). These townships would contain 36 Sections, each a mile square *(shown at upper left)*. These townships were to be oriented true to North/South, but because lines of true north eventually converge at the North Pole, it was impossible to keep the townships oriented and a square 36 miles. Because of this, Townships are rarely truly square. On the North and West side of Townships there are often tracts of land with unusual sizes. These are referred to as fractional forties and eighties.

Sections can be divided into Quarter Sections. Those pieces are referred to by their quadrant direction (i.e., NE, NW, SE, or SW ¼). A Quarter Section of land represents approximately 160 acres and measures approximately ½ mile on a side *(shown at lower left)*. Quarter sections can be further broken down into Quarter Quarter Sections, each piece being referred to by its quadrant direction, in reference to its parent division *(see lower left)*. Divisions can also be made by halves, and are referred to by N, S, E or W ½. By this method, land can be subdivided and referenced in many ways. Figure 4 shows several different divisions possible and their descriptions. Reading the legal description back to front is usually the easiest way to understand and follow it.

General Land Information

Using this Plat Book

NOTICE: This book is published as a guide only. All land ownership data is based upon Official Public Records at the Winnebago County Administration Building and is current as of 10-31-2006. Due to continual sales and property transfers it is not possible to guarantee 100% accuracy and as such neither Winnebago County, Wisconsin and its Departments, nor any employees or any other entity from whom data was obtained shall be held liable for any inaccuracies or omissions. The maps and acreages presented are representations, are intended to be a general reference to the public, and are not intended for legal, survey, or other related uses, and are advisory only. Winnebago County assumes no liability for any use or misuse of this information. For the full disclaimer please see page 1.

The display of parcel information in this plat book is determined by the size and shape of individual parcels and may include all or part of the following information: Acreage (the acreage displayed may be rounded up or down to the nearest whole number), Owner Initials, Abbreviated Name or Full Name, and Secondary Owner if applicable.

The collar of each map either has a house number grid (even pages) or a latitude/longitude (odd pages) based on the North American Datum 1983 (NAD 83).

NOTICE: To find a parcel of land by Landowner, turn to the Ownership Index section contained within this book. There you will find listed all the landowners in the unincorporated areas of the County. Landowners in cities and villages are not included in the index. Landowner names appear alphabetically by last name and are followed by the section and page number in which his/her parcel of land is located.

The Street Index alphabetically lists all of the named roads (public) in the County. The road name in the index is followed by the section and page number(s) where that road is located.

The Subdivisions and Assessor's Plat Index lists all the named subdivisions or plats in the County. The section and page number follows the subdivision or plat name in the index.

ANNOUNCEMENT: Need to find more detailed information on a property? Please check out the Winnebago County Land Records Search Tool located on the Winnebago County web site at **www.co.winnebago.wi.us**. You can find up to date general property information (including owner name, mailing address, site address, school and other special assessment districts), recording, assessment, and tax roll information and view the tax parcel map. Searches by Parcel Identification Number (PIN), Address, Municipality and Section, Town and Range are allowed
